Strategic Data Management Joins the Spectra Logic Partner Program

INDIANAPOLIS, IN – Strategic Data Management www.sdmindy.com announced it has joined the Spectra Logic Partner Program. Strategic Data Management will sell and support Spectra Logic's Backup and Archive Appliances mid to large-size data intensive companies.

About Spectra Logic Corporation: Spectra Logic designs and manufactures simple, reliable and scalable storage solutions to store, backup, archive and protect data. Our people, processes and technologies deliver a future-proof architecture to address the problems of data growth, costs, security, storage efficiency, tiering and reliability. In Spectra's thirty year history, we have helped tens of thousands of customers worldwide gain control of their data storage needs with our modular T-Series tape libraries, nTier disk storage systems and BlueScale™ software. Spectra provides unmatched customer service and uptime through SpectraGuard™ programs that currently support organizations such as NASA, Argonne National Labs, GMAC, Exempla Healthcare, The US Army, National Geographic Global Media, Sky TV and the New England Sports Network (NESN).

"Spectra Logic has changed the landscape of backups with their revolutionary products, and tier storage approach. Tape is no longer slow and difficult to use. Any company that manages large amounts of data will save money compared to the traditional disk to disk backups. Strategic Data Management is working with our clients to classify data and automate the movement of this data to tape, saving companies thousands of dollars." says James Jordan, President of Strategic Data Management.

About Strategic Data Management:

Founded in 2007, Strategic Data Management provides expertise in managing organizational data needs. We make your data available in a classified and secure fashion across an organization. Strategic Data Management leverages relationships with partners and integrate the best of breed products to provide customized solutions, consulting, and support to manage and protect your data.
